PROJECTS, WORKSHOPS & HACKATHONS

Pablo Renderer

Jan. 2024 – Current

Passion project

Physics based rendering engine and OpenGL abstraction framework build **from scratch in C++**

- Flexible, reliable and fast renderer where users can experiment with different computer graphics concepts

ligplaatsenzeeland.nl

Oct. 2023 – Current

Ricardo Benken

Full stack web application where users can browse and rent parking spaces for their boats or yachts

- First **commercial** project build using **Laravel** framework

Hangout Safari

Oct. 2023 – Feb. 2024

HZ University of Applied Science

Full-stack web application that helps students cope with social anxiety

- Motivation factor is incorporated in the interactive **3D Safari world** where users can collect animals as rewards for attending social events.
- Application is build using **microservice architecture**

Screen Saver

Joint Research Center Zeeland (JRCZ)

Jun. 2023

Hackathon where the manager of JRCZ asked us to create a screensaver for the **biggest screen** in Zeeland.

- We have delivered a 3D presentation of departments in JRCZ that is controlled with **clapping your hands**.

Introduction to 3D graphics programming with C++ and OpenGL

We are in IT together conference

Nov. 2023

I organized a workshop where participants could learn and implement basic concepts of Computer Graphics.

- Workshop was immediately fully booked and feedback from participants was very positive

Curious Village

Dec. 2022 – Jan. 2023

HZ University of Applied Sciences

Educational game that helps children understand how valuable their personal information is.

- Game is build without any game engine or library purly with **TypeScript** and displayed on HTML canvas

EDUCATION

HZ University of Applied sciences

Jun, 2027

BCs. , Software Engineering

Middelburg, NL
